

Abdul Samad A

Aspiring Data scientist

+91-7795738104 | [LinkedIn](#) | [Github](#) | samad.ali.hulikunte@gmail.com

SKILLS

- **Languages** : Python, HTML, SQL
- **Frameworks** : snowflakes database , llama-index, difusion models , PyTorch, TensorFlow
- **Data Analysis & Visualization** : EDA, Data Analysis, Tableau, Machine Learning
- **Other Skills** : web scraping, NLP, Deep Learning, computer vision , RESTful API, AWS, Docker

EXPERIENCE

AI ENGINEER INTERN -FREELANCER

Jul 2023 - Present

omdena

- Fine-tuned large language models (LLMs) for chatbot applications, optimizing prompt engineering and incorporating retrieval-augmented generation (RAG) techniques alongside computer vision capabilities to enhance conversational AI.
- Designed and deployed AI chatbots utilizing advanced RAG, prompting techniques, and computer vision tools to improve user interactions and deliver accurate, context-aware, and visually enhanced responses across various platforms.
- Led and contributed to interdisciplinary projects that applied AI technologies, including computer vision, in diverse domains such as healthcare and customer service, driving innovation and enhancing operational efficiency.

AI/ML Intern

Mar 2023 - Sep 2023

USEReady

- Enhanced large language models (LLMs) through fine-tuning and prompt engineering techniques to optimize performance across diverse generative tasks.
- Applied Langgraph, machine learning models, and Retrieval-Augmented Generation (RAG) methods to integrate external knowledge sources, addressing real-world engineering challenges with advanced AI solutions.
- Deployed AI and machine learning models on Amazon Web Services (AWS), utilizing services like SageMaker, EC2, and Lambda for scalable, efficient deployment.
- Leveraged vector databases such as Pinecone and FSSAI to manage and query large-scale embeddings for ML-driven engineering applications.
- Tested and refined machine learning models to improve performance and accuracy.

PROJECTS

Sales support bot

<https://github.com/samadali-ai/Build-a-Retrieval-Augmented-Generation-RAG-based-LLM-assistant-using-Streamlit-and-Snowflake-Cortex->

- Developed a FastAPI application for real-time event processing and query management.
- Implemented asynchronous tasks with Redis Queue (RQ) for efficient background processing.
- Designed data synchronization processes, managing MongoDB data and JSON file storage.
- Automated AI-based crew management to improve query processing and response generation.

YOLOv5 Object Detection Mobile App

<https://github.com/samadali-ai/yolo-object-detection--mobile-app>

- Developed a cross-platform mobile app using Flutter for real-time object detection and room classification with YOLOv5.
- Built a Flask-based API to process images and return object detection results using the YOLOv5 model.
- Integrated YOLOv5 (ONNX format) for optimized mobile performance and accurate real-time detection.
- Enhanced the app's UI with multi-image selection, advanced detection toggles, and real-time result display.
- Used ngrok for secure HTTPS tunneling to enable remote access and API communication.

ACHIEVEMENTS

- Certificate in NLP -Natural Language Processing with Python - Udemy
- Deep learning specialization-Coursera
- AWS Cloud Technical Essentials - Coursera

EDUCATION

Scaler

2023

Specialized in Data Science & Machine Learning

Coursework: Python, Deep learning, Machine learning, MLOps, Statistics, Computer vision, NLP, mathematics for ML, SQL, Tableau

Reva University

2023

BE/B.Tech/BS in Electronic and Communication Engineering (ECE)
